

Get the information you need for custody cases

Evaluate stress in the parent–child relationship

The **Parenting Stress Index™, Fourth Edition (PSI™-4)** examines stress in the parent–child dynamic (parents of children ages 1 month to 12 years). Administration time is 20 minutes. Available in paper and pencil, as a software download, and for **online administration and scoring via PARiConnect**. A screening version, the **PSI-4 Short Form (PSI-4-SF)**, takes just 10 minutes to administer and is now available for Spanish administration on PARiConnect!

Gather necessary data for custody evaluations

The **Uniform Child Custody Evaluation System (UCCES)** is a uniform custody evaluation procedure that provides a comprehensive, systematic method for gathering data and organizing the information necessary to determine a child's (ages 1 to 17 years) best interest. Administration time varies. Available in paper and pencil.

Measure the strength of the child-rearing alliance between parents

The **Parenting Alliance Measure™ (PAM™)** assesses the parenting aspects of a couple's relationship and provides you with each parent's perception of the strength of their parenting alliance—how cooperative, communicative, and mutually respectful they are with regard to caring for their children. Appropriate for a variety of parenting partners (married, divorced, unmarried, and more) for parents of children ages 1 to 19 years. Administration time is 10 minutes. Available in paper and pencil.
