

Kids with disabilities need support. Evaluate students using trusted, efficient measures.

Assess intelligence thoroughly and quickly

The **Reynolds Intellectual Assessment Scales™, Second Edition (RIAS™-2)** offers a full IQ battery—for less time and less cost than similar measures—for individuals ages 3 to 94 years. The **Reynolds Intellectual Screening Test™, Second Edition (RIST™-2)** provides a quick and reliable measure of general cognitive aptitude. Administration time for the full battery is 35 to 50 minutes; the RIST-2 takes 10 to 15 minutes. Available in paper and pencil or for **online scoring via PARiConnect**.

Now available! In-Person e-Stimulus Books and Kits allow you to administer the RIAS-2 and RIST-2 face-to-face via tablet. And the RIAS-2/RIST-2 Remote enables you to administer using minimally modified test materials and your videoconferencing platform.

Assess academic skills

The **Academic Achievement Battery™ (AAB™)** is a full achievement battery for students ages 4 to 85 years that provides an accurate overview of a student's academic skills in reading, math, spelling, and reading comprehension. Administration time for the Standard Form is 15 to 30 minutes (Comprehensive and Screening forms are also available). Available in paper and pencil or for **online scoring via PARiConnect**.

Now available! In-Person e-Stimulus Books and Kits allow you to administer the AAB Comprehensive Form face-to-face via tablet.

Diagnostic achievement tests that give you answers

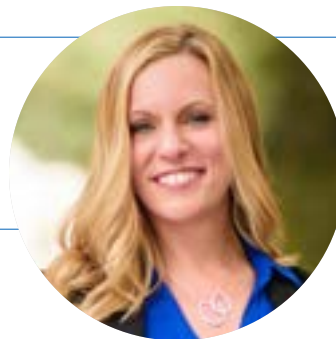

The **Feifer Assessment of Reading™ (FAR™)**, **Feifer Assessment of Mathematics™ (FAM™)**, and **Feifer Assessment of Writing™ (FAW™)** use a brain-based approach to identify why students have difficulty with reading, math, and writing—helping you to make a specific learning disability diagnosis. Administration time varies based on the test, the student's grade, and the subtests given. Screening forms are available for all three products. Available in paper and pencil or for **online scoring via PARiConnect**.

Now available! In-Person e-Stimulus Books and Kits allow you to administer the FAR, FAM, and FAW (and their screening forms) face-to-face via tablet. And the FAR Screening Form Remote enables you to administer using minimally modified test materials and your videoconferencing platform.
