

Get the full picture when conducting a forensic evaluation

One of the most important innovations in personality assessment

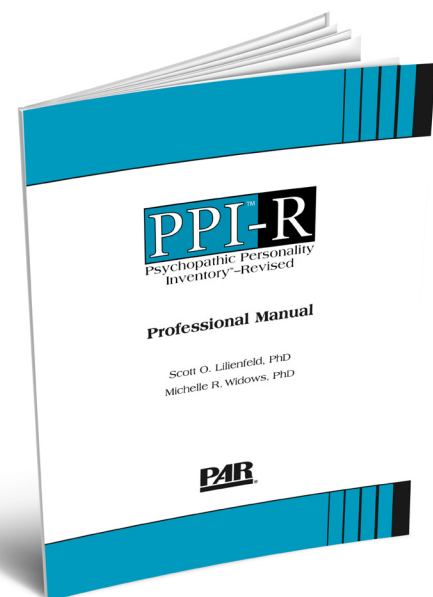

The **Personality Assessment Inventory™ (PAI®)** features 344 items that comprise 22 nonoverlapping scales covering the constructs most relevant to a broad-based assessment of mental disorders in individuals ages 18 to 89 years. Administration time is 25 to 55 minutes. Available in paper and pencil, as a software download, for the PAR professional report service, and for **online administration and scoring via PARiConnect**. Also available in Spanish, with a revised translation coming soon!

Assess psychopathic personality traits

The **Psychopathic Personality Inventory™-Revised (PPI™-R)** is a 154-item self-report measure of both global psychopathy and the component traits of psychopathy for individuals ages 18 to 86 years. Administration time is 15 to 25 minutes. Available in paper and pencil and as a software download.

Answer questions about an individual's psychological stability

The **Rorschach[®] Interpretation Assistance Program: Version 5 Forensic Edition (RIAP5[™] FE)** is a software program that allows you to produce unlimited specialized forensic reports from an administration of the **Rorschach[®] Psychodiagnostic Test Plates** to individuals ages 18 and older. Ideal when you're conducting forensic evaluations in cases of criminal responsibility and competency to stand trial, personal injury, and parental fitness/child custody.

Screen for depression, anxiety, and alcohol dependence in minutes

The **Patient Health Questionnaire-9 (PHQ-9)** is a 9-item depression screener designed for use with adults in a primary care setting that has garnered overwhelming popularity in research and clinical practice. The **Generalized Anxiety Disorder-7 (GAD-7)** is a 7-item screener for anxiety based on the diagnostic criteria for generalized anxiety disorder in the *DSM-IV[™]*; ideal for use in research and clinical practice. The **Michigan Alcoholism Screening Test (MAST)** is a 24-item questionnaire developed to screen for alcohol dependence and alcohol-related behaviors. All three are available as part of the CheckKIT family of products on PARiConnect.
