Alicia Carrillo, BS

PAR®

INTRODUCTION

Bibliographies are invaluable resources for researchers and clinicians. However, they inevitably become outdated as new research emerges after they are published. Online reference managers like Zotero have solved this problem by being continually updated, allowing anyone with internet access to read and share up-to-date bibliographies at any time. Even better—creating an account is free (zotero.org), and researchers can choose to use the online website platform or download the desktop application, which has a more flexible user interface.

HOW PAR AND ZOTERO WORK TOGETHER TO HELP YOU

PAR continually strives to provide excellent supplemental resources to support the use of its products. In addition to white papers and presentations, PAR offers product-specific bibliographies that can be downloaded as a Word document from parinc.com/Supplemental-Resources or accessed online through Zotero using any of the links provided here. PAR encourages use of the platform to facilitate research and collaboration on topics related to each assessment.

**PAR currently offers bibliographies for the following products:**

- Behavior Rating Inventory of Executive Function, Second Edition (BRIEF2)
- Booklet Category Test (BCT)
- Brief Visuospatial Memory Test–Revised (BVMT-R)
- Children's Color Trails Test (CCTT) and Color Trails Test (CTT)
- Digit Vigilance Test (DVT)

- Emotional Disturbance Decision Tree (EDDT), Emotional Disturbance Decision Tree–Parent Form (EDDT-PF), and Emotional Disturbance Decision Tree–Self-Report Form (EDDT-SR)
- Eyberg Child Behavior Inventory (ECBI) and Sutter-Eyberg Student Behavior Inventory–Revised (SESBI-R)
- Frontal Systems Behavior Scale (FrSBe)
- Hopkins Verbal Learning Test–Revised (HVLT-R)
- Iowa Gambling Task, Version 2 (IGT2)
- Memory for Intentions Test (MIST)
- Mini-Mental State Examination, 2nd Edition (MMSE-2)
- Multilingual Aphasia Examination, Third Edition (MAE)
- NEO Inventories
- Neuropsychological Assessment Battery (NAB)
- Parenting Stress Index, Fourth Edition (PSI-4)
- Personality Assessment Inventory (PAI)
- PDD Behavior Inventory (PDDBI)
- Rey Complex Figure Test and Recognition Trial (RCFT)
- Reynolds Adolescent Depression Scale, 2nd Edition and Reynolds Child Depression Scale, 2nd Edition
- Reynolds Intellectual Assessment Scales, Second Edition (RIAS-2)
- Ruff Figural Fluency Test (RFFT)
- Self-Directed Search (SDS)
- State-Trait Anger Expression Inventory–2 (STAXI-2)
- Structured Inventory of Malingered Symptomatology (SIMS)
- Suicidal Ideation Questionnaire (SIQ) and Adult Suicidal Ideation Questionnaire (ASIQ)
- Telephone Interview for Cognitive Status (TICS)
- Trauma Symptom Checklist for Children (TSCC) and Trauma Symptom Checklist for Young Children (TSCYC)
- Trauma Symptom Inventory–2 (TSI-2)
- Victoria Symptom Validity Test (VSVT)
- Wisconsin Card Sorting Test (WCST)

USING THE ZOTERO WEBSITE

After creating an account, users may search for and join product- or topic-specific groups. Clicking on the group name takes the user to the group's overview page, the central dashboard of the bibliography, where they can view the group's description and recently added items; access the group's library, which consists of references to the group's resources; and invite colleagues to access the bibliography.

Figure 1 shows the group overview page for the Personality Assessment Inventory (PAI). It's easy to see recent updates because the page lists references in the order they were modified. Each page contains a description of the product and a link to the PAR product web page, so users can easily learn more about or purchase the product they are researching.
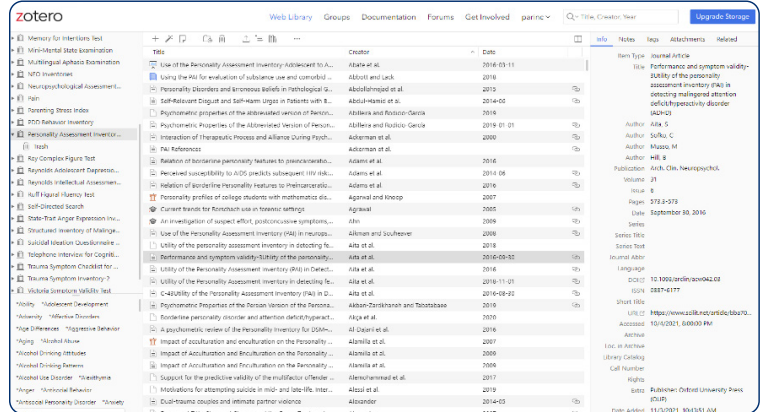

Figure 1. Zotero group overview page for the Personality Assessment Inventory (PAI).

In the group library view (Figure 2), users can sort the references in a variety of ways, including alphabetically by title, publication, or author (creator); by date added; or by date modified. Users can also export each resource's citation information and view

the resource's title, authors, abstract, and tags. Users can add a reference to their personal Zotero library for future use by selecting the desired reference(s) and clicking the folder icon on the toolbar near the top of the screen.
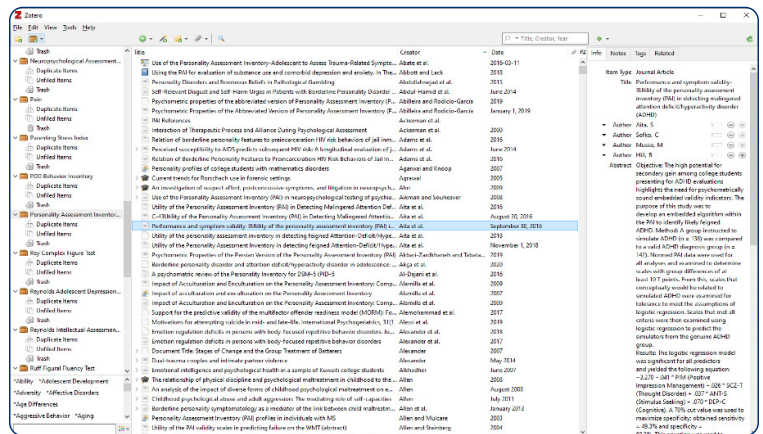

Figure 2. Zotero group library page for the Personality Assessment Inventory (PAI).

USING THE ZOTERO DESKTOP APPLICATION

Figure 3 shows the Zotero desktop application view of the PAI group library. The desktop application is the most powerful version of Zotero: It includes all the features of the browser version plus advanced search, interface customization, offline reference management, data syncing, and word processor integration.

CONCLUSION

PAR will continue to add more product-specific bibliographies to Zotero and update existing groups with new research. In addition, this white paper will be updated with additional links each time a new group is created. Interested individuals can also refer to parinc.com/Supplemental-Resources for additional resources, such as product presentations and white papers. PAR intends for these bibliographies to serve as a starting point to help foster discussion, increase collaboration, and create a better understanding of the complex topics addressed by its products.
